An inherent legacy of higher standards
The **2014 Tradition** is a full residential, four season fifth wheel. It features a straight roof line with barrelled ceilings, 8’ tall slide outs and extra large frameless Thermopane windows, which combine to provide an amazing amount of space and storage.

For full time RVers, the Tradition offers residential 16" O.C. construction with wool insulation for great protection in all climates. Step inside to find hand laid vinyl tile floor, built-in Bose® Sound Bar and Lane® leather furniture.

Don’t sacrifice your household amenities, take them with you while you travel, with the **2014 Tradition**.
Surround yourself in the beautifully hand-crafted Mocha Cherry cabinetry throughout the entire coach. All Tradition floorplans offer abundant storage space for full-time needs, lighted island countertop edging and large pull-out trash can cabinets.
Residential styled design attention to detail & proven engineering

The master suite features a walk-in closet with built-in dresser, abundant hanging space with extra storage under the bed. Full-ducted low profile A/Cs with cold air return allows for a restful night sleep, even with the A/C running.
In every Tradition you will find a standard 47” LCD TV in the living room with built-in Bose® Sound Bar and a 29” LCD in bedroom.

The optional Sage/Mushroom custom cabinetry is the first of its kind in the industry and creates a beautiful, residential look. Every Tradition features solid cherry raised panel cabinet doors and lighted LED islands.
Four season **comfort** is built in, not added on.

The gourmet kitchen features 18 cu. ft. Whirlpool® residential refrigerator and double layered over-the-island light feature. An abundant amount of storage, including dual pantries, surround the high-end appliances creating the perfect kitchen for full time use.

Large 48” fiberglass shower and deep vanity base makes the master bath functional and luxurious.

90gal. Grey Water Tank
45gal. Black Water Tank

EMERGENCY ROADSIDE ASSISTANCE is provided with purchase of each Tradition

Residential washer/dryer hook-up in laundry closet.
Subzero Thermo-Pack Insulation package is standard on Tradition and encases the entire structure resulting in better year round comfort control of your extended travel suite. Residential style High Density Wool Insulation is utilized in the roof, side walls, sub-floor assembly and is even added to the underbelly frame space. High density wool provides improved efficiency by filling any voids, and we even take the extra step to glue-apply the wool insulation within the walls to totally eliminate settling.

Just compare!
Many RVs use rigid block foam. Although a good insulator, this method leaves too many uninsulated voids which greatly compromises the efficiency. Others use only a thin reflective foam barrier, not practical for multi-seasonal extended stay travel.

EcoBatt High Density Wool Insulation is derived from renewable materials.
Optional TrailAir® Air Ride pin box provides a smoother ride plus better handling while minimizing noise and vibration.

The large pass-through basement storage area is felt lined and provides abundant space for extended travel lifestyles. The copper water manifold system is easily accessible and heavy duty basement doors open easily and close securely with two gas assist lift arms and lockable slam latches.

The coach and slide outs have aluminum wall studs and roof trusses positioned 16" on-centers, and the aluminum sub-floor joists are 14" on-center. Residential style high density wool insulation, in the side walls, is glued into place to prevent future settling. All spaces and voids are filled with wool insulation as well.

The Tradition Advantage

The exclusive StepUp, power 4-step entry, is a revolutionary feature that provides added stability in the step, push button control for easy set-up, and eliminates the inconvenience of wrestling the conventional entry steps in/out every time you travel. The powerful twin motors extend/retract the step in seconds and with all the extra welds we have eliminated the “sag” effect seen on other 4-step entry’s.

All aluminum sills and wall studs are mechanically joined and the aluminum sill tubing is fully reinforced internally with wood, providing greater strength and stability when it is “bolted-through”, never screwed, to the sub-floor structure and the steel frame below.

A Dev EXCLUSIVE

Thicker side walls allow for high density wool insulation, with an integrated 1/4" thick foam core moisture barrier, to eliminate condensation and add an additional insulating moisture barrier layer.

The large pass-through basement storage area is felt lined and provides abundant space for extended travel lifestyles. The copper water manifold system is easily accessible and heavy duty basement doors open easily and close securely with two gas assist lift arms and lockable slam latches.
